| <b>Warning</b>      | Nylon loop straps are difficult to dry after getting wet, so you need<br>to pay attention to maintenance and timely drying to avoid fuzzing due<br>to surface friction. If the strap has burrs, you can cut it off with<br>scissors and then bake it with fire to restore it. |                 |        |
