Note:

When operating bolt A, first loosen the white plastic cap on the bolt. Insert the bolt with the loosened plastic cap into the corresponding hole in the board, or completely remove the plastic cap and press it into the designated hole. Make sure that the white plastic cap is fully embedded in the board. Finally, use a tool to tighten the bolt and secure it to the board.

Hinweis:

Wenn Sie den Bolzen A betätigen, lösen Sie zunächst die weiße Kunststoffkappe auf dem Bolzen. Führen Sie den Bolzen mit der gelösten Kunststoffkappe in das entsprechende Loch in der Platine ein, oder entfernen Sie die Kunststoffkappe vollständig und drücken Sie sie in das vorgesehene Loch. Achten Sie darauf, dass die weiße Kunststoffkappe vollständig in der Platine versenkt ist. Ziehen Sie abschließend die Schraube mit einem Werkzeug an und befestigen Sie sie auf der Platine.

Remarque:

Lors de l'utilisation du boulon A, il faut d'abord desserrer le capuchon en plastique blanc sur le boulon. Insérez le boulon avec le capuchon en plastique desserré dans le trou correspondant de la planche, ou retirez complètement le capuchon en plastique et enfoncez-le dans le trou désigné. Veillez à ce que le capuchon en plastique blanc soit complètement enfoncé dans la planche. Enfin, utilisez un outil pour serrer le boulon et le fixer à la planche.

Nota:

Al accionar el perno A, afloje primero la tapa de plástico blanca del perno. Inserte el perno con la tapa de plástico aflojada en el orificio correspondiente de la placa, o retire completamente la tapa de plástico y presiónela en el orificio designado. Asegúrese de que la tapa de plástico blanca quede totalmente incrustada en la placa. Por último, utilice una herramienta para apretar el perno y fijarlo a la placa.

Nota:

Quando si utilizza il bullone A, allentare prima il tappo di plastica bianco sul bullone. Inserire il bullone con il tappo di plastica allentato nel foro corrispondente del pannello, oppure rimuovere completamente il tappo di plastica e premerlo nel foro designato. Assicurarsi che il tappo di plastica bianco sia completamente inserito nel pannello. Infine, utilizzare uno strumento per stringere il bullone e fissarlo al pannello.

Uwaga:

Podczas obsługi śruby A należy najpierw poluzować białą plastikową nasadkę na śrubie. Włóż śrubę z poluzowaną plastikową zaślepką do odpowiedniego otworu w płytce lub całkowicie zdejmij plastikową zaślepkę i wciśnij ją do odpowiedniego otworu. Upewnij się, że biała plastikowa zaśleпка jest całkowicie zagłębiona w płytce. Na koniec dokręć śrubę za pomocą narzędzia i przymocuj ją do płytki.

Opmerking:

Wanneer je bout A gebruikt, draai dan eerst de witte plastic dop op de bout los. Steek de bout met het losgemaakte plastic kapje in het overeenkomstige gat in de printplaat of verwijder het plastic kapje volledig en druk het in het daarvoor bestemde gat. Zorg ervoor dat het witte plastic kapje volledig in de printplaat zit. Gebruik ten slotte een stuk gereedschap om de bout vast te draaien en vast te zetten op de printplaat.
